LANGUAGES

Spanish — Native
English — C1 Advanced
Portuguese — Intermediate

TECHNICAL SKILLS

Languages
Python, Java, JavaScript, TypeScript, SQL, C++

Frameworks
React, React Native, Next.js, Node.js, Express, NestJS, Tailwind

Databases
PostgreSQL, MySQL, SQLite, Firebase Firestore

Tools
Git, GitHub, Docker, Linux CLI, Postman, Expo, Vercel

Testing
Vitest, unit testing, API testing with Postman

AI & Prompting
Claude, GitHub Copilot, OpenAI API

Practices
Agile/Scrum, Kanban, OOP

EDUCATION

B.S. in Systems Engineering
Universidad de la Cuenca del Plata
2021 – Present (70% completed)

PROFESSIONAL SUMMARY

Backend-focused software developer and Systems Engineering student (70% completed) with hands-on experience in relational data modeling, concurrency and applications in Python, Java and TypeScript. Comfortable across the stack with React, React Native and Firebase. Brings over a year of IT support and technical consulting experience, plus two years coordinating hospitality teams. Uses AI coding tools daily as part of the development workflow.

TECHNICAL PROJECTS

Pádel Posadas: Match Organizer App — *React Native / TypeScript / Firebase*

- Built a mobile app with Expo Router and TypeScript to organize padel matches by skill category, supporting singles, pairs and multi-court events.
- Implemented Firebase authentication and role-based Firestore security rules (player, court owner and admin), with sign-up requests reviewed by admins.

github.com/tomasromerobaylac/padel-posadas-app

ParkApp: Parking Reservation System — *Python / SQLite*

- Designed a five-table relational schema with composite keys and UNIQUE and CHECK constraints, so the database itself enforces business rules.
- Implemented three user roles, an admin panel, the full reservation lifecycle and hourly occupancy forecasting with polynomial regression (NumPy).
- Found a race condition that allowed the same spot to be booked twice and designed the fix: a conditional UPDATE inside a transaction as optimistic concurrency control.

github.com/tomasromerobaylac/ParkApp-Backend-System

CPU Scheduling Simulator — *Java / Bash / Linux*

- Implemented and compared FCFS, SJF and Round Robin scheduling under heavy computational workloads (matrix solving).
- Measured waiting time, turnaround time and throughput alongside real CPU, memory and disk metrics collected with Bash scripts, shown in a custom GUI.

PROFESSIONAL EXPERIENCE

IT Support Specialist & Software Consultant — ANYWAY *Dec 2022 – Feb 2024*

- Advised 500+ clients on hardware and software selection, diagnosing and resolving installation, configuration and operating system issues.
- Built a stock-tracking system in Excel using formulas, speeding up inventory reporting for the team.
- Onboarded and trained 5+ new hires on technical support and customer service processes.

Front-of-House Team Lead — Rustic Beer Bar, Holy Brewery, Antares *Jul 2020 – Nov 2022*

- Led teams of up to 8 people across three venues during high-volume shifts serving 200+ customers per night, coordinating kitchen, bar and floor.
- Managed weekly inventory and cash reconciliation, and resolved escalated customer issues while keeping service quality under pressure.
